The Vega Americas project is now under construction on 50 acres of the original 1999 purchase area. Atricare, Rhinestahl, Master's Pharmaceutical, PCC Aerostructures and SPS Technologies are other economic development success stories that speak to the long-term vision the City had for this area. Additional acreage is available for sale that would be strategic to future expansion and development of the Mason R&D Park. The City was approached by the residents for purchase. He said it is anticipated that the eventual sale of the land for industrial/office purposes will be a positive return on the City's current investment and align with the City's long-term economic development strategy. It further protects taxpayers throughout the school district by

limiting encroachment of residential development at the expense of revenue enhancing corporate development.

Eric Hansen said the Mason Arts Council presented a plan for the development of the Mason Regional Center for the Arts and requested Council's support for the project. The organization's vision identifies two phases of development for the Center. Phase I would include a performing

arts center and Phase II focuses on visual arts and would complete the facility. In partnership with the City, the Mason Arts Council hopes to raise funds for construction of the facility. Per Resolution 2020-18, the City is pursuing securing property while the City and Arts Council develop a partnership that furthers success of the Center and enhances City amenities and community quality of life. He stated the City has identified two possible locations for the Center: the former Gould property located at the western end of W. Main Street; and Corwin Nixon Park, east of the baseball fields. Each site location has its challenges, and the goal of this engineering work is to aid in the selection of a site by better identifying these challenges and related development costs. He said this information is needed to develop an agreement to include further commitments, timelines, and action steps including identifying property that best positions the partnership's success.

A motion to read by title only was made by Councilmember Nelson, seconded by Councilmember Honerlaw. VOTE: ALL YEAS.

Eric Hansen discussed Ordinance 2021-52, Ordinance 2021-53 and Ordinance 2021-54 together. Perhaps the largest investment the City is responsible for is the public roadways. The City's roadways require ongoing maintenance and reinvestment. Annually, the City of Mason pursues a Street Maintenance Program to proactively repair and resurface roadways, prolonging the life of this investment. He said as part of the annual budget process, funds have been authorized to advance a new approach to better prepare the Street Maintenance Program for the future, similar to how the City's approach to fleet equipment has progressed. The 2021 Budget includes a typical amount of annual funding along with a set-aside amount to add to a reserve balance used when pricing is attractive or to even out future budget cycles when larger roadways are in need of resurfacing. This year represents both good market price and timing of maintenance to increase investment in the Street Maintenance Program. For maximum impact, a total of \$4.5 million is recommended this year to take advantage of pricing, timing, and logistical efficiency. Eric stated filling and sealing the cracks in pavement is one of the cost-effective ways to maintain a roadway, extending the wearing surface life 5-8 years. With this year's attractive pricing we are proposing to nearly triple the usual amount of crack sealing/filling work. Increasing this component of the program will have a significant impact on preserving the life of the roadway at the best return on investment.

A motion to read by title only was made by Councilmember Nelson, seconded by Councilmember Chance. VOTE: ALL YEAS.

Jennifer Heft discussed Ordinance 2021-55 and Ordinance 2021-56 together. She said there are current limitations of hosting the event in its typical format including lack of availability of national entertainment acts due to Covid-19, risk of making financial commitments despite unknowns of the pandemic and improvements to Mason City Schools parking lots that may impact

the event's layout. Options were discussed on how to provide a safe and successful event despite this year's circumstances while balancing Council's desire to maintain the Red, Rhythm and Boom (RRB) brand that the community recognizes and enjoys. Due to these challenges, Council recommended offering a Downtown Block Party event for the community at the Downtown Plaza on July 3 to continue the tradition of offering a patriotic themed event near Independence Day while also supporting the City's small business community. The Block Party would include music entertainment, food and beverages along with a fireworks display. In addition, Council recommended shifting the traditional larger scale RRB event to a later date to coincide with the annual Heritage Festival scheduled for Saturday, September 18. Hosting the large-scale event in September will allow additional time for the Covid-19 situation to improve, provide greater flexibility of the Mason Municipal Campus event footprint as well as potentially provide more options and better pricing to secure national entertainment acts. In order to successfully execute these events, legislation is needed to secure the contract for fireworks for both events as well as Rumpke restroom trailers and services for the September 18 event on the Mason Municipal Campus.
